

SofTouch™

— Developed from over —
65 years of breastfeeding research

**Supports the 3 steps
of baby's natural sucking motion**

Use this chart as a guide & change nipples as your baby grows.

Nipple Quality Indication

- Material: Silicone Rubber ■ Heat Resistance: 140°C
- Sterilization Method: Boiling, Steam, Chemical, UV[^]

[^] It is recommended to replace the product when it starts to discolour &/ or turn cloudy.

After each use, wash thoroughly and sterilize. Before first use, be sure to clean and place in boiling water for 5 minutes. This is to ensure hygiene. Always wash your hands with soap before cleaning, sterilizing and feeding. Boiling sterilization: Place in water and bring the water to a boil. Sterilize for 5 minutes after the water comes to a boil. Chemical, Microwave and UV sterilization are possible. Use sterilization products made specifically for baby bottles and nipples. Follow the instructions in the user's manual for these products.

Note: If your baby grows comfortable with a certain nipple, he/ she may object to a new one. Rotate the use of 2 or more nipples for about 2 months before replacing them, or earlier if necessary to prevent wear and tear regardless of the number of times they have been used.

Pigeon Corporation

4-4, Nihonbashi Hisamatsu-cho,
Chuo-ku, Tokyo 103-8480 JAPAN

MADE IN INDONESIA

Complies with
BS EN 14350

* Based on INTAGE SRI+ data 2018 - 2023, Nursing Bottle & Nipple.
Retain above information for future use.

Caution:

- To protect the ventilation valve and Y-cut nipple opening, a white powdered food additive has been applied. Before using for the first time, wash thoroughly.
- Use both hands to gently rub clean the ventilation valve, vent, and nipple opening. If you scrub too hard or pull on these, the valve may split, which can cause leaks.
- The tip of the nipple is very delicate. When using a nipple brush to clean the nipple, wash very carefully.
- Inspect before each use and pull the nipple in all directions. The nipple may be worn by biting. Special attention is needed for a teething child.
- Do not leave a nipple in direct sunlight or heat, or leave in disinfectant ("sterilizing solution") for longer than recommended, as this may weaken the nipple.
- When not in use, keep in a dry, covered container.
- Ensure that all parts including areas which may not be visible are thoroughly washed and rinsed, to remove any milk residues.

For your child's safety and health

WARNING!

- Continuous and prolonged sucking of fluids will cause tooth decay.
- Always check food temperature before feeding.
- Throw away at the first signs of damage or weakness.
- Keep components not in use out of the reach of children.
- Never attach to cords, ribbons, laces or loose parts of clothing. The child can be strangled.
- Never use nipples as a soother.
- Always use this product with adult supervision.
